THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

During the course of the last two years, underground depots for munitions and other materiel have been constructed in the Fruska Gora region, because of its favorable geographic and military position, since it extends south of the Danube River, over mountainous terrain, but still close to the Vojvodina plains.

1. Munitions Depot near Prahovo: This depot is located east of the railroad station and is actually a tunnel with various exits. The closest exit is 100 meters east of the far side of the railroad station. Construction work on the tunnel was completed during January 1952. The tunnel is five meters wide, seven meters high and more than one kilometer in length. All work was done in cement, and special ventilators were installed to ensure an adequate air supply.
2. Munitions Depot near Beocin: This depot is located south of the railroad of Beocin. Construction on the depot was initiated in early 1948 and has been carried out to the present by the military. The depot, which has not yet been completed, has four entrances. All the work has been done in reinforced concrete. The depot has ventilators to ensure an adequate air supply.
3. Munitions Depot near Smederevski Karlovac: This depot is located under a mountain four kilometers from Karlovac, in the direction of Novi Sad, approximately 50 meters from the highway running between those two cities.
4. Munitions Depot near Vrdnik: This completed depot is located near the city, at the foot of a mountain. Details are unavailable, except that it is known to include a fuel depot containing 35 giant cisterns on the slope of a mountain.
5. Munitions Depot near Lednica: Located in the slope of a hill close to Lednica. This is a new underground depot, including three giant cisterns.

5. Depot near Novi Sad: This depot is located northwest of the Railovo railroad station near Novi Sad. Fuel cisterns are located in an open field 700 meters from the station. There are four cisterns, each five meters high, all surrounded by a high wall. Entrance to the depot is guarded by a sentinel.
6. Depot at Petrovaradin: New depot recently completed, located three or four kilometers southwest of Petrovaradin and one kilometer west of the Petrovaradin-Ruma road. Large new truck-repair shops are located at the depot. The old fortress which is near Petrovaradin also serves as a warehouse for military materiel, clothes and general food products.
